DETAILED ACTION

Allowable Subject Matter

1. **Claims 1-4, 7-13** are allowed.
2. The following is an examiner's statement of reasons for allowance:

With respect to claim 1, the closest prior art, Vestergaard (US 2002/0068574) teaches the network selection in a mobile telecommunications system, Skog (US 6,330,445) teaches the system and method are provided for routing of a USSD message directly from an MSC/VLR to an external node, and Stadelmann (US 6,738,622) teaches the roaming method and devices appropriate therefor, alone or in combination, the limitations of claim 1 set forth above.

But Vestergaard, Skog and Stadelmann fail to anticipate or render obvious, alone or in combination, the features of wherein the mobile telephony application is a call back application allowing establishment of a connection between the mobile communication device and a further mobile communication device by intervention of the second network exchange, in which the step of initializing comprises the steps of: transferring a request for call back, the number to be called associated with the further mobile communication device and the number of the mobile communication device to the second network exchange; and accepting the call from the second network exchange to establish the connection as set forth in claim 1.

Dependent Claims 2-4, and 7-13 are allowable for the same reason as set forth above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
